Section 1.0 – Introduction and Pricing Summary

This document constitutes File 5 of the proposal submitted by Horus Technology (Interesting Interests Inc.) in response to RFP# 202603058 issued by the State of Maine, Department of Secretary of State, Maine State Archives. This file contains the completed Cost Proposal Form (Appendix H) and a detailed cost breakdown covering the full contract term including the Initial Period of Performance and both Renewal Periods.

The proposed cost is presented as a single fixed amount covering all services, personnel, AWS infrastructure, and platform licensing required to fully implement, operate, support, and maintain the Records Management System from July 1, 2026 through June 30, 2031. The cost is structured to provide maximum transparency and value to the Department, with no hidden fees, overage charges, or unanticipated cost escalations.

Contract Period	Fixed Cost
Initial Period of Performance (July 1, 2026 – June 30, 2027)	\$351,000.00
Renewal Period #1 (July 1, 2027 – June 30, 2029)	\$390,600.00
Renewal Period #2 (July 1, 2029 – June 30, 2031)	\$279,200.00
TOTAL PROPOSED COST (All Periods – Fixed Amount)	\$1,020,800.00

Section 2.0 – Appendix H: Cost Proposal Form

STATE OF MAINE

Department of Secretary of State – Maine State Archives

RFP# 202603058 | Records Management System

Bidder Name:	Horus Technology (Interesting Interests Inc.)
---------------------	---

Proposed Cost:	\$1,020,800.00
-----------------------	-----------------------

Special Instructions compliance: The above Proposed Cost covers the Initial Period of Performance and all Renewal Periods as defined in Part I, Section D of the RFP (July 1, 2026 through June 30, 2031). The Proposed Cost is presented as a fixed amount as required. This cost includes all labor, AWS infrastructure, platform licensing, integration development, data migration, training, and ongoing support and maintenance services required to fully comply with all contract terms, conditions, and RFP

requirements. No costs related to proposal preparation or contract negotiation are included.

Section 3.0 – Labor Cost Breakdown by Role

The following table details labor costs by role across all three contract periods. Hours reflect the work plan defined in File 4. Rates are sourced from Horus Technology's established rate schedule for Southern California market rates. Renewal period hours reflect reduced engagement consistent with steady-state support and maintenance operations.

Role	\$/Hr	Yr 1 Hrs	Yr 1 Cost	Ren1 Hrs	Ren1 Cost	Ren2 Hrs	Ren2 Cost
Principal-in-Charge / Account Director	\$145	120	\$17,400.00	160	\$23,200.00	120	\$17,400.00
Technical Project Manager	\$105	640	\$67,200.00	640	\$67,200.00	480	\$50,400.00
Solution Architect (AWS/Cloud)	\$140	400	\$56,000.00	320	\$44,800.00	160	\$22,400.00
Senior Full-Stack Engineer	\$115	640	\$73,600.00	640	\$73,600.00	320	\$36,800.00
DevOps / SRE Engineer	\$120	320	\$38,400.00	480	\$57,600.00	400	\$48,000.00
Business Analyst	\$95	240	\$22,800.00	160	\$15,200.00	80	\$7,600.00
QA Analyst / Tester	\$65	200	\$13,000.00	160	\$10,400.00	80	\$5,200.00
Technical Writer / Editor	\$80	160	\$12,800.00	120	\$9,600.00	80	\$6,400.00
LABOR SUBTOTAL		2720	\$301,200.00	2680	\$301,600.00	1720	\$194,200.00

Total Labor Cost (All Periods): \$797,000.00

Section 4.0 – AWS Infrastructure Cost Breakdown

The following table details estimated AWS infrastructure costs across all contract periods. All estimates are based on current AWS published pricing for the us-east-1 (N. Virginia) primary region with Cross-Region Replication to us-west-2 (Oregon). Costs decrease in Renewal Period #2 as Reserved Instance discounts and optimization efficiencies are applied. Infrastructure costs are included in the fixed Proposed Cost and will not be billed separately.

AWS Service / Component	Yr 1 Cost	Ren 1 Cost (2 yrs)	Ren 2 Cost (2 yrs)	5-Yr Total
AWS ECS Fargate (application compute)	\$8,400.00	\$14,400.00	\$14,400.00	\$37,200.00
Amazon RDS PostgreSQL (Multi-AZ)	\$6,000.00	\$10,800.00	\$10,800.00	\$27,600.00
Amazon S3 + Cross-Region Replication	\$2,400.00	\$4,800.00	\$4,800.00	\$12,000.00

Amazon OpenSearch Service	\$4,800.00	\$8,400.00	\$8,400.00	\$21,600.00
AWS Cognito + KMS + WAF + Shield	\$3,600.00	\$6,000.00	\$6,000.00	\$15,600.00
Amazon CloudFront + API Gateway	\$1,800.00	\$3,000.00	\$3,000.00	\$7,800.00
CloudWatch + CloudTrail + X-Ray	\$1,200.00	\$2,400.00	\$2,400.00	\$6,000.00
Amazon QuickSight (dashboards)	\$2,400.00	\$4,800.00	\$4,800.00	\$12,000.00
Data transfer + misc. AWS services	\$1,200.00	\$2,400.00	\$2,400.00	\$6,000.00
AWS INFRASTRUCTURE SUBTOTAL	\$31,800.00	\$57,000.00	\$57,000.00	\$145,800.00

Total AWS Infrastructure Cost (All Periods): \$145,800.00

Section 5.0 – Platform License Costs

The following table details RMS platform licensing costs. The platform license covers access to the off-the-shelf cloud-based Records Management System software, including all standard modules, feature updates, and vendor technical support included in the base license tier. License fees decrease in Renewal Period #2 reflecting multi-year contract pricing.

License Component	Yr 1 Cost	Ren 1 Cost (2 yrs)	Ren 2 Cost (2 yrs)	5-Yr Total
RMS Platform SaaS License (annual subscription – all modules)	\$18,000.00	\$32,000.00	\$28,000.00	\$78,000.00
PLATFORM LICENSE SUBTOTAL	\$18,000.00	\$32,000.00	\$28,000.00	\$78,000.00

Section 6.0 – Total Cost of Ownership Summary

The following table consolidates all cost categories into the total fixed proposed cost covering the complete contract term. This is the cost entered on Appendix H and used for scoring under the RFP's cost evaluation formula.

Cost Category	Yr 1 Cost	Ren 1 Cost (2 yrs)	Ren 2 Cost (2 yrs)	5-Yr Total
Labor (Personnel Services)	\$301,200.00	\$301,600.00	\$194,200.00	\$797,000.00
AWS Infrastructure	\$31,800.00	\$57,000.00	\$57,000.00	\$145,800.00
RMS Platform License	\$18,000.00	\$32,000.00	\$28,000.00	\$78,000.00

TOTAL PROPOSED COST	\$351,000.00	\$390,600.00	\$279,200.00	\$1,020,800.00
----------------------------	---------------------	---------------------	---------------------	-----------------------

TOTAL FIXED PROPOSED COST (Appendix H Submission Amount)	\$1,020,800.00
---	-----------------------

Section 7.0 – Cost Assumptions and Basis of Estimate

The following assumptions underlie the cost estimate presented in this proposal. These assumptions are provided to ensure transparency and to enable the Department to fully evaluate the basis of the proposed cost.

✓ Labor Rate Assumptions

- All labor rates are based on Horus Technology's established rate schedule for Southern California market rates, reflecting the actual fully-loaded hourly costs for each role category.
- Year 1 (Initial Period) hours reflect the full implementation work plan detailed in File 4, including discovery, architecture, integration, migration, testing, training, and go-live support.
- Renewal Period hours reflect a reduced engagement model consistent with steady-state support, maintenance, compliance monitoring, and quarterly optimization activities.
- The Principal-in-Charge (Michael Huy Walker) provides executive oversight and client relationship management at a reduced hourly engagement throughout all periods.

✓ AWS Infrastructure Assumptions

- AWS infrastructure costs are estimated based on current AWS published pricing for us-east-1 (N. Virginia) primary region as of May 2026. Actual costs may vary marginally based on usage patterns.
- Cost estimates assume a moderate-volume deployment appropriate for a state archives system: up to 500 concurrent users, 10TB of total data storage, and standard processing workloads.
- Cross-Region Replication to us-west-2 (Oregon) is included in all storage cost estimates.
- Reserved Instance pricing is applied to Renewal Period estimates, reflecting 1-year and 3-year commitment discounts of approximately 30–40% compared to on-demand rates.

- All AWS costs are included in the fixed Proposed Cost and will not be billed separately or as overages.

✓ Platform License Assumptions

- Platform license costs reflect an estimated annual SaaS subscription fee for the off-the-shelf RMS platform proposed, covering all standard modules including records management, circulation, warehouse tracking, and analytics.
- Multi-year contract pricing is reflected in Renewal Period estimates, with decreasing annual license costs in Renewal Period #2.
- License costs include standard vendor support, security updates, and feature releases included in the base subscription tier.

✓ Scope Assumptions

- All services described in the RFP Scope of Work and in Horus Technology's proposed services narrative (File 4) are included in this cost estimate.
- Data migration from the current system is included in Year 1 labor costs, assuming the current system can export data in a standard structured format (CSV, XML, or JSON). Any migration from a proprietary binary format requiring specialized extraction tooling may require a scope adjustment.
- All three State Records Center warehouse locations are included in the scope and cost estimate.
- Travel costs are not anticipated for this engagement, as all services will be delivered remotely. If in-person meetings are required by the Department, reasonable travel costs will be billed at cost with prior approval.
- The cost estimate assumes the Department will provide timely access to the current system, SOM Active Directory, and key stakeholders during the discovery and implementation phases.

Section 8.0 – Value Proposition

Horus Technology's proposed cost reflects a best-value approach that balances competitive pricing with the full scope of services required to deliver a secure, compliant, and operationally excellent Records Management System for the Maine State Archives. The following points summarize the value delivered within the proposed fixed cost.

✓ Complete Fixed-Price Certainty

The single fixed proposed cost eliminates budget uncertainty for the Department. All labor, infrastructure, licensing, migration, training, and support costs are included.

There are no hourly overages, change order risks for scope items already defined in the RFP, or variable infrastructure billing surprises.

✓ **AWS Advanced Consulting Partner Expertise at Small Business Rates**

Horus Technology brings the technical credentials of an AWS Advanced Consulting Partner — including 16+ AWS certifications, 200+ successful implementations, and a portfolio of enterprise clients including Ford Credit, Bank of Montreal, and Experian — at the cost structure of a DGS-certified California Small Business. The Department receives Fortune 100-grade AWS architecture without the overhead of a large systems integrator.

✓ **Proven Records and Compliance System Delivery**

The DegreeData Enterprise Educational Data Platform project demonstrates that Horus Technology has delivered a system functionally equivalent to the Maine Archives RMS requirement — managing records across 500+ institutions, with advanced search, retention management, compliance automation, and 24/7 managed services — achieving 180% ROI for the client within 14 months. The Department can expect comparable operational improvements and long-term value.

✓ **Decreasing Costs Over Time**

The proposed cost structure reflects the natural cost reduction pattern of a well-implemented cloud system: high upfront investment in Year 1 for implementation and configuration, followed by significantly lower costs in Renewal Periods as the system reaches steady state and AWS Reserved Instance discounts are applied. This pricing model rewards the Department for the multi-year contract commitment while ensuring full implementation quality in Year 1.

✓ **No Vendor Lock-In**

All State data remains under the Department's custodianship at all times. Upon contract termination, Horus Technology will return all data in an agreed format and securely destroy all copies per NIST SP 800-88. The AWS-based architecture uses open standards and documented APIs, ensuring the Department can migrate to an alternative provider or solution without data loss or proprietary constraints.
